

Product Details:

The SEPT Quality Kit contains 5 checklist documents and one template document. This suite of documents focuses on those companies that are trying to get certified to ISO 9001:2015 with emphasis on software. In addition to being used internally, these documents help a company assess a software supplier's conformance to standards as well as the completeness of that supplier's work products. Because many software companies have problems with software configuration management, this kit also includes the SEPT product which contains templates for implementing software configuration management conforming to ISO/IEC 12207 and 15288 standards.

A buyer of this kit will add a valuable set of documents to their technical library while saving 30% to 50% off individual prices if purchased separately. The kit is available in either PDF or Word format - the latter format allowing you to easily tailor the documents to your specific organization and/or project.

The kit comes with 20 hours of free consultation from experts that have firsthand knowledge of the underlying standards and processes to which the documents refer. This offer is valid for 60 days after purchase of the product. Specific SEPT products (documents) included in this kit are:

1. [A Checklist for ISO 9001:2015](#)
A checklist to ensure conformance with ISO Standard 9001:2015 "Quality Management Systems - Requirements 2015 Edition." This checklist defines physical evidence (policies, procedures, plans, records, documents, audits, and reviews) that are required or suggested as being required by the standard.
2. [A Checklist for ISO/IEC 90003:2014](#)
A checklist to ensure conformance with guidelines for the application of ISO 9001:2008 to computer software
3. [A Supplier Assessment Checklist](#)
A checklist to use with your software suppliers to determine if they meet the requirements found in ISO/IEC 90003:2014
4. [A Checklist for ISO Standard 9004:2009](#)
A checklist for ensuring conformance with ISO 9004:2009. "Managing For The Sustained Success Of An Organization - A Quality Management Approach."
5. [Templates for Software Configuration Management](#)
This product provides a set of templates for implementing software configuration management conforming to ISO/IEC 15288 and 12207 standards

**Buy this kit and realize a 30-50% savings over purchasing products individually!
